## Office Action Summary

Application No.

09/923,581

Applicant(s)

MCALINDEN, PAUL

Examiner

Asad M. Nawaz

Art Unit

2155

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 17 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-5, 7-13, 15-21 and 23 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-5, 7-13, 15-21 and 23 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

### **DETAILED ACTION**

1. This action is responsive to the amendment received 2/17/05. Claims 1-5, 7, 9-13, 15, 17, 21, and 23 have been amended. Claims 6, 14, 22, and 24 have been canceled. No new claims have been added. Accordingly, claims 1-5, 7-14, 15-21, and 23 are pending.

### ***Claim Objections***

2. Claims 9-16 are objected to because of the following informalities: Claim 9 recites "An article/product comprising a computer readable medium storing ... if executed, enable a processor-based system...". The claim language should be changed to "...when executed by a processor based system..." or similar wording. Appropriate correction is required.

### ***Response to Arguments***

3. Applicant's arguments with respect to the claimed invention have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-4, 7-12, 15-21, and 23 are rejected under 35 U.S.C. 103(a) as being anticipated by Andreakis et al (US Patent No. 6,816,895), hereinafter referred to as Andreakis further in view of Mukherjee et al (USPGPUB 2003/0073440).

As to claim 1, Andreakis teaches a method comprising: transferring a selected probe routine from the server to the client and enabling the software to determine the capabilities of the client and to provide information back to the server about those client capabilities. (Abstract; col1, lines 15-41; col 2, lines 1-18; col 4, lines 15-29; col5, lines 32-35)

However, Andreakis does not explicitly indicate determining characteristics of a client in order to select a selected probe routine from among at least two available probe routines to transfer from the server to the client. Mukherjee teaches this limitation in defining different information to be transmitted back. (0047-0052)

It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the teachings of Mukherjee into those of Andreakis in order to make the system more efficient. By enabling the system to know certain characteristics of a device such as presence information, etc., the system can more fully customize and tailor the data transmission to suit the needs of the device.

Claims 9 and 17 are essentially the product and system for the method of claim 1 above, and thus are rejected under the same rationale.

As to claim 2, Andreakis teaches the method of claim 1 including transferring the selected probe routine over a wireless network. (col 3, lines 17-20 and 49-51)

Claims 10 and 19 are essentially the product and system for the method of claim 2 above, and thus are rejected under the same rationale.

As to claim 3, Andreakis teaches the method of claim 1 including transferring the selected probe routine over a wired network. (col 3, lines 17-20 and 49-51)

Claims 11 and 20 are essentially the product and system for the method of claim 3 above, and thus are rejected under the same rationale.

As to claim 4, Andreakis teaches the method of claim 1 including transferring the selected probe routine over a telephone network. (col 3, lines 21-39)

Claims 12 and 21 are essentially the product and system for the method of claim 4 above, and thus are rejected under the same rationale.

As to claim 7, Andreakis teaches the method of claim 1 wherein said characteristics include classmark information about client. (col 1, lines 59-63; col 4, lines 3-14 and 21-39)

Claims 15 and 23 are essentially the product and system for the method of claim 7 above, and thus are rejected under the same rationale.

As to claim 8, Andreakis teaches the method of claim 7 including using the classmark information to select software to transfer from the server to the client. (col 1, lines 59-63; col 4, lines 3-14 and 21-39)

Claims 16 and 24 are essentially the product and system for the method of claim 8 above, and thus are rejected under the same rationale.

As to claim 18, Andreakis teaches the system of claim 17 including at least one client. (Abstract; Fig 1)

6. Claims 5 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over official notice in view of Microsoft Computer Dictionary (Fifth Edition).

As to claim 5, Andreakis teaches the method of claim 1 but does not teach transferring the software over a local area network. However, Andreakis does teach the use of networks that are wired, wireless, GSM, DCS, WCDMA. It would have been obvious for one in the ordinary skill in the art to use a Local Area Network where the aforementioned networks are used because a LAN is also used to interconnect nodes by a communications link enabling any device to interact with another.

Claim 13 is rejected under similar rationale.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2155

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Conclusion***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Asad M. Nawaz whose telephone number is (571) 272-3988. The examiner can normally be reached on M-F 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saleh Najjar can be reached on (571) 272-4006. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
